

My family is participating in the Family School Connection Program at Hands On Hartford. It is funded by the CT Children's Trust Fund through the CT Department of Social Services. We are in the program because our child is at risk of not doing well in school.

The program helps us by having a home visitor come to my house about once a week to help me with learning how to meet my family's needs. They teach us parenting skills, how to find resources in the community, and spend more time helping my children with school work and solving problems that interfere with success at school. They also provide educational programs for the parents, and encourage us to finish our education and find jobs.

These services are very important to my family. I don't want the funds to be cut.

Please help our children succeed in school through the help and support of the Family School Connection Program.

Thank you,
